

## Cash Rewards for Low Carbon Electricity

Households and communities who install generating technologies such as small wind turbines will from April be entitled to claim payments for the low carbon electricity they produce.

From 1 April householders and communities who install low carbon electricity technology such as wind turbines will be paid for the electricity they generate, even if they use it themselves. The level of payment depends on the technology and is linked to inflation.

They will get a further payment for any electricity they feed into the grid. These payments will be in addition to benefiting from reduced bills as they reduce the need to buy electricity. The scheme will also apply to installations commissioned since July 2009 when the policy was announced.

The Table below provides an overview of FIT levels and duration for Wind technology.

Technology	Scale	Tariff Level for new installations			Tariff lifetime (years)
		Year 1: 1.04.10-31.03.11	Year 2: 1.04.11-31.02.12	Year 3: 1.04.12-31.03.12	
Wind	≤1.5kW	34.5	34.5	32.6	20
Wind	>1.5 - 15kW	26.7	26.7	25.5	20
Wind	>15 - 100kW	24.1	24.1	23.0	20
Wind	>100 - 500kW	18.8	18.8	18.8	20
Wind	>500kW - 1.5MW	9.4	9.4	9.4	20
Wind	>1.5MW - 5MW	4.5	4.5	4.5	20
